
3. In case of major failure

- ▶ In case where files need to be changed for everyone, system admin can run ``sudo rm`` or ``sudo git clone`` to edit all files on disk.
- ▶ Users can just type ``source("/home/omg.R")`` into your console to edit the files on WD.

Issues to address using Google Cloud

1. Installing packages can take up to 1.5 hours
2. Downloading data from School server can be throttled
3. Laptops might not handle the computations
4. Ad hoc changes to the GitHub repo could disrupt everything
